

Programming: Python, Jave, C++, C#, JavaScript, and SQL.

Object oriented programming, front end development with React.JS

## **EDUCATION**

**BACHELOR OF COMPUTER SCIENCE** 2020-2023

Concordia University - Montreal **Graduated with Distinction** 

**BACHELOR OF ECONOMICS. BUSINESS ADMINISTRATION AND MARKETING** 2014-2018

**Tishreen University - Lattakia** 

# **Online Presence**

Potrfolio Website

in <u>LinkedIn</u>

# **LANGUAGES**

**English**: Proficient Arabic: Mother Tongue **German**: Beginner

# **TOOLS**

**IDEs and environments**: Visual Studio Code, Eclipse, PyCharm. Linux, MacOS, Windows

Project Management: Git, GitHub,

Other: Davinci Resolve, Unity

# **SAMI IBRAHIM**

Junior Software Engineer

#### **PROFILE**

I am a recent Computer Science graduate from Concordia University, eager to tackle new challenges and advance my software engineering skills in a full-time role.

Throughout my academic career, I have had to develop code in teams at many different occasions. Through these projects, I have practiced the AGILE methodology. I thrive in teams and take on full ownership of my part on each project I work for.

#### INDUSTRY EXPERIENCE

## Software Engineering Intern

January 2022 – June 2022

## Zetane Systems Inc. Montreal, Quebec

- · Helped design, implement, ship, and support software features, ensuring that deliverables were stable and well-tested.
- · Improved front-end features by adding components and industry standard styling.
- Developed Google Analytics 4 functionalities.
- Increased Search Engine Optimization (SEO) scores from 65% to 100%.

## **PAST PROJECTS**

#### Al Face Mask Detector: GitHub

 Implemented a Deep Learning Convolutional Neural Network (CNN) using Python and trained it to detect whether a person is wearing a face mask or not, as well as the type of mask that is being worn.

### Serial Cleaners 3D Game: GitHub

- 3D multiplayer game built in Unity using C#
- Idea: Two players work together to clean a crime scene left behind by a serial killer. Their goal is to leave the crime scene squeaky clean in the shortest time possible before the next residents arrive.

## Halloween fighters 2.5D Game: Gameplay

• Idea: Two players work together to clean a crime scene left behind by a serial killer. Their goal is to leave the crime scene squeaky clean in the shortest time possible before the next residents arrive.

## **Battleship Game: GitHub**

• Used Java to build a version of the game of Battleship against the computer. This version of the game is played on a single 8 by 8 grids.

#### Rentrack Data base: GitHub

• Designed a relational database using SQL to help streamline the process of managing customers, employees, reservations, invoices, and payments of truck renting company.
